PEST SPECIALISTS

WHAT PRECAUTIONS DO I NEED TO TAKE?

INSIDE

You must be out of the building for a least 3 hours, including animals

Make sure that all windows are closed and do not wash for 2 weeks

Put away all food and kitchen appliances, wipe down cooking and preparation surfaces afterwards using cold water, warm water will reactive the chemical

Put the toilet seat and lid up and toilet paper away

Put away toothbrushes, facecloths and towels, hair/makeup brushes etc

Pull duvets/bedspreads up over pillows, clothes must be put away or under the bedspreads, otherwise they will need washed before re-wearing

If there are babies or toddlers, cover their toys, and bedding

Any pet food bowls or bedding are covered or turned over

Remove or cover any goldfish or birds. Turn off fish filters for 4 hours

Flat screen TVs, computer keyboards and mice must be covered

Basically anything you don't want product on should be put away or covered

Upon re-entry please open all windows to ventilate for at least 30 minutes.

OUTSIDE

Make sure that all windows are closed and do not wash for 2 weeks

Make sure there is no washing on the clothesline

If there are swan plants they must be moved or covered please

Do not need to wipe away spider webs before we spray

Dogs must be tied up or in a kennel at least 5 meters away from building

Do not waterblast within the guarantee time – 6 months

If there is a fishpond, we need the filter to be turned off for 4 hours and cover pond with a solid tarp, kept out of the water so the chemical does not mix with the water. (IE: not the cheap blue version)
